

Development Plan

Workout Management System

1. First iteration:

- User authentication: login, logout, registration, manage user account;
- Exercise management: view(allow filtering) all existing exercises and create, update or delete custom ones.

2. Second iteration:

- Workout management: all CRUD operations on workout plans, workout days and workout exercise from a day;

3. Third iteration:

- Start a workout session;
- Statistics and progress: personalized data for the user.
